Subject index

A

Abscesses, recurrent staphylococcal, associated with defective neutrophil chemotaxis and allergic rhinitis, 27 (Abst.)
Acetylsalicylic acid (ASA) and tartrazine in patients with asthma, hypersensitivity to, 5 (Abst.)
Acid phosphatase, identification of allergen B of bee venom as; allergens in bee venom (Hoffman, D. R.), 364
Acknowledgment to reviewers, 1
Adenosine deaminase, deficiency of, not associated with severe combined immunodeficiency, 7 (Abst.)
  monophosphate, cyclic, and glycogen, effect of beta adrenergic agonist, prostaglandins, and cortisol on lymphocyte levels of (Lee, T.-P., et al.), 408
    response, cyclic, of lymphocytes in normal and asthmatic subjects to norepinephrine and salbutamol, comparison of (Makino, S., et al.), 348
Adenyl cyclase responses, lymphocytes, effects of histamine-sensitizing factor and cortisol on (Lee, T.-P.), 79
Adolescents, measles outbreak among, 24 (Abst.)
Adrenoceptor resistance, bronchial beta, lack of, in asthmatics during long-term treatment with terbutaline (Larsson, S., et al.), 93
Aerosol, albuterol, dose-response effects of, compared with isoproterenol and placebo aerosols (Spector, S. L., et al.), 280
  intranasal steroid, in perennial rhinitis; comparison with antihistamine compound, 28 (Abst.)
Aerosolized H_1 receptor antagonist (diphenhydramine), effect of, in further studies on mechanism of human histamine-induced asthma (Casterline, C. L., and Evans, R., III), 420
Agranulocytosis, amidopyrine; drug inhibition of granulocyte colonies in presence of patient's serum, 26 (Abst.)
Airway constriction, large, in allergic rhinitis (Fairshter, R. D., et al.), 243
Albuterol aerosol, dose-response effects of, compared with isoproterenol and placebo aerosols (Spector, S. L., et al.), 280
Allergen(s) in bee venom; identification of allergen B of bee venom as acid phosphatase (Hoffman), 354
    two new high molecular weight allergenic specificities (Hoffman, D. R., et al.), 147
  grass, polymerization of mixtures of (Patterson, R., et al.), 314
  of honeybee venom; melittin (Paull, B. R., et al.), 334
  in Hymenoptera venoms; comparison of venom and venom sac extracts (Hoffman, D. R.), 367
  purified ragweed, in vitro, lymphocyte responses to; proliferative responses in normal, newborn, agammaglobulinemic, and atopic subjects (Buckley, R. H., et al.), 70
Allergenic extracts, simple method for keeping at temperature near 4° C during in-office use for skin testing and immunotherapy (Van Metre, T. E., Jr.), 341 (Brief communication)
Allergic bronchoconstriction, reaginic hypersensitivity and, canine model for (Kepron, W., et al.), 64
  bronchopulmonary aspergillosis, bronchocentric granulomatosis complication of (Hanson, G., et al.), 83
  contact dermatitis reactions in man, degranulation of basophilic leukocytes in, 2 (Abst.)
  population, migrant, approach to diagnosis and treatment in (Schatz, M.), 254
  rhinitis, asthma and, mesquite pollen aeroallergen in (Novey, H. S., et al.), 359
    clinical evaluation of intranasal topical flunisolide therapy in (Kammermeyer, J. K., et al.), 287
    large airway constriction in (Fairshter, R. D., et al.), 243
    pollen-induced seasonal, cromolyn sodium nasal solution in prophylactic treatment of (Handelman, N. I., et al.), 237
    relative value of peripheral blood, secretion and tissue eosinophilia in diagnosis of different patterns of, 22 (Abst.)

January, pp. 1-92; February, pp. 93-184; March, pp. 185-270; April, pp. 271-342; May, pp. 343-404; June, pp. 405-472.
Abstracts: January, pp. 1-4; February, pp. 5-10; March, pp. 11-16; April, pp. 17-22; May, pp. 23-28; June, pp. 29-34.

Allergy(ies), horse serum protein, high incidence of, in various autoimmune disorders (Ring, J., et al.), 185
Immunology Listings, 65, 69, 71
miscellaneous, 3, 13, 19, 26 (Absts.)
testing, in vitro, automated histamine analysis for; correlation of skin test results with in vitro whole blood histamine release in 82 patients (Siraganian, R. P.), 214
Aluminum compounds, beryllium, zirconium, and, in rabbit, experimental studies of sensitization to (Kang, K.-Y., et al.), 425
Alveolitis, diffuse, as complication of penicillamine treatment for rheumatoid arthritis, 13 (Abst.)
Amidopyrine agranulocytosis; drug inhibition of granulocyte colonies in presence of patient's serum, 26 (Abst.)
Aminoglycoside antibiotics, common, cross-sensitivity of, 32 (Abst.)
Ampicillin polymers as elicitors of passive cutaneous anaphylaxis, 3 (Abst.)
Amprolium hydrochloride, asthma due to inhaled chemical agents, 3 (Abst.)
Analgesic challenge, diagnosis of aspirin idiosyncrasy by, 6 (Abst.)
Anaphylaxis, intermittent, chronic urticaria and, 9 (Abst.)
passive cutaneous, ampicillin polymers as elicitors of, 3 (Abst.)
Angioedema, hereditary, C1q levels in (Brasher, G. W.), 263
treatment of, with danazol, 25 (Abst.)
Announcements, 92, 183, 404, 460
Ant sensitivity, harvester; in vitro and in vivo studies using whole body extracts and venom (Pinnas, J. L., et al.), 10
Antibiotics, common aminoglycoside, cross-sensitivity of, 32 (Abst.)
Antibody(ies), anti–keyhole limpet, in normal unsensitized individuals (Burke, G. P., et al.), 309
concentrations, specific IgE, associated changes in cellular responsiveness, total serum antigen-binding capacity and, in studies of perennial ragweed immunotherapy (Irons, J. S., et al.), 190
dependent cellular cytotoxicity in asthmatics (Flaherty, D. K., et al.), 48
formation, reaginic, in mouse. VIII. Depression of ongoing IgE antibody formation by suppressor T cells, 33 (Abst.)
IgE, to house dust, mite, animal allergens, and molds in house dust hypersensitivity, 13 (Abst.)
IgG, detection of, against pigeon intestinal mucosa antigens in pigeon breeders' sera using immunofluorescent technique, 9 (Abst.)
formed by grass pollen–allergic patients during immunotherapy, subclass typing of, 21 (Abst.)
production, prolonged IgE, in hypersensitive mice, effect of multiple injections of antigen on (Altman, R., and Levine, B. B.), 120
reaginic, demonstration of, on human basophils by immune adherence to allergen-coated Sepharose beads, 33 (Abst.)
Antigen(s) dose response and specificity of production of lymphokine eosinophil stimulation promoter, 19 (Abst.)
E, polymerized and unpolymerized, comparison of, for immunotherapy of ragweed allergy, 11 (Abst.)
effect of multiple injections of, on prolonged IgE antibody production in hypersensitive mice (Altman, R., and Levine, B. B.), 120
major, isolation and purification of, in immediate hypersensitivity to cockroach (Twarog, F. J., et al.), 154
viral, interferon and delayed-type hypersensitivity to, 27 (Abst.)
Antigenic relationships bewteen pollens, methodology and results of studies of, botanic relationships between pollens summarized as related to (Schatz, M.), 254
Antitrypsin, alpha-1, in childhood asthma (Schwartz, R. H., et al.), 31
Arthritis, rheumatoid, diffuse alveolitis as complication of penicillamine treatment for, 13 (Abst.)
Aspergillosis, bronchopulmonary, bronchocentric granulomatosis complication of (Hanson, G., et al.), 83
Aspirin idiosyncrasy by analgesic challenge, diagnosis of, 6 (Abst.)
sensitive asthma, common or, bronchial response to inhaled prostaglandin $F_2\alpha$ in patients with (Orehek, J., et al.), 414
Asthma, abnormal lymphocytic metabolism in (Lee, T.-P., et al.), 408
acute, mechanism of increase in total lung capacity during, 12 (Abst.)
and allergic rhinitis, mesquite pollen aeroallergen in (Novey, H. S., et al.), 359
autumnal, role of ragweed pollen in (Bruce, C. A., et al.), 449
bronchial, hyposensitization with house dust mite vaccine in, 23 (Abst.)
childhood, alpha-1 antitrypsin in (Schwartz, R. H., et al.), 31
clinical value of bronchial provocation testing in (Cavanaugh, M. J., et al.), 41
chronic childhood, variation in theophylline clearance rate with time in (Leung, P., et al.), 440
effect of troleandomycin on theophylline elimination in patients with (Weinberger, M., et al.), 228
clinical investigation of fenoterol, new bronchodilator in (Simi, W. W., and Miller, W. C.), 178 (Brief communication)
common or aspirin-sensitive, bronchial response to inhaled prostaglandin $F_2\alpha$ in patients with (Orehek, J., et al.), 414
due to inhaled chemical agents—amprolium hydrochloride, 3 (Abst.)
to nonoccupational exposure to toluene (Tolylene) diisocyanate, 1 (Abst.)
effect of atenolol on ventilatory and cardiac function in, 18 (Abst.)
and hay fever, 1, 5, 11, 17, 23, 29 (Absts.)
human bronchial, leukocyte cyclic-3′,5′-nucleotide phosphodiesterase activity in, 5 (Abst.)
histamine-induced, further studies on mechanism of (Casterline, C. L., and Evans, R., III), 420
pharmacokinetics of theophylline in children with, 18 (Abst.)
and rhinitis, nasal polyps in (Settipane, G. A., and Chafee, F. H.), 17
severe acute, high-dose corticosteroids in, 17 (Abst.)
chronic, beclomethasone dipropionate aerosol for, graded dose assessment of efficacy of (Toogood, J. H., et al.), 298
thyroid disease and (Bush, R. K., et al.), 398 (Allergy grand rounds)
treatment of, in children, comparison of subcutaneous terbutaline with epinephrine in (Sly, R. M., et al.), 128
Asthmatic(s), antibody-dependent cellular cytotoxicity in (Flaherty, D. K., et al.), 48
boys, maturational delay and temporal growth retardation in (Hauspie, R., et al.), 200
and bronchitics, application of strong beta-2 stimulus in (Jenne, J. W., et al.), 383
children, assessing bronchodilator responsiveness in (Tinkelman, D. G., et al.), 109
correlation between increased bronchial responsiveness to histamine and diminished plasma cyclic adenosine monophosphate response after epinephrine in (Apold, J., and Aksnes, L.), 343
lack of bronchial beta adrenoceptor resistance in, during long-term treatment with terbutaline (Larsson, L., et al.), 93
patients, effect of Bronkosol and its components on cardiopulmonary parameters in (Spector, S. L., et al.), 371
with elevated immunoglobulin E, platelet thrombopathy in (Maccia, C. A., et al.), 101
Atenolol, effect of, on ventilatory and cardiac function in asthma, 18 (Abst.)
Autoimmune disorders, various, high incidence of horse serum protein allergy in (Ring, J., et al.), 185
Autumnal asthma, role of ragweed pollen in (Bruce, C. A., et al.), 449

B

Basophil accumulation in experimental cutaneous candidiasis in guinea pigs, study of possible mechanisms of (Sohnle, P. G., and Kirkpatrick, C. H.), 171
degranulation, direct, detection of immediate hypersensitivity in rabbits by (Benveniste, J., et al.), 271
Beclomethasone dipropionate aerosol in perennial rhinitis (Tarlo, S. M., et al.), 232
for severe chronic asthma, graded dose assessment of efficacy of (Toogood, J. H., et al.), 298
Bee venom, allergens in; identification of allergen B of bee venom as acid phosphatase (Hoffman, D. R.), 364
two new high molecular weight allergenic specificities (Hoffman, D. R., et al.), 147
–specific IgE and IgG, clinical application of measurements of serum levels of (Light, W. C., et al.), 247
Beryllium, zirconium, and aluminum compounds in rabbit, experimental studies of sensitization to (Kang, K.-Y., et al.), 425
Beta adrenergic agonist, prostaglandins, and cortisol, effect of, on lymphocyte levels of cyclic adenosine monophosphate and glycogen (Lee, T.-P., et al.), 408
adrenoceptor resistance, bronchial, lack of, in asthmatics during long-term treatment with terbutaline (Larsson, S., et al.), 93
responses, subsensitivity of, during therapy with long-acting beta-2 preparation (Jenne, J. W., et al.), 383
BRL 10833, inhaled, protective effect of, on allergen induced bronchospasm, 6 (Abst.)
Bronchial asthma, human, leukocyte cyclic-3′,5′-nucleotide phosphodiesterase activity in, 5 (Abst.)
beta adrenoceptor resistance in asthmatics during long-term treatment with terbutaline (Larsson, S., et al.), 93
hyperreactivity to house dust in asthmatics, twenty-four-hour rhythm in (Gervais, P., et al.), 207
lumens, ultrastructural identification of mast cells obtained from (Ts'ao, C., et al.), 320
provocation testing in childhood asthma, clinical value of (Cavanaugh, M. J., et al.), 41
response to inhaled prostaglandin $F_2\alpha$ in patients with common or aspirin-sensitive asthma (Orehek, J., et al.), 414
responsiveness, increased, to histamine and diminished plasma cyclic adenosine monophosphate response after epinephrine in asthmatic children, correlation between (Apold, J., and Aksnes, L.), 343
Bronchitics, asthmatics and, application of strong beta-2 stimulus in (Jenne, J. W., et al.), 383
Bronchocentric granulomatosis; complication of allergic bronchopulmonary aspergillosis (Hanson, G., et al.), 83
Bronchoconstriction, allergic, canine model for reaginic hypersensitivity and (Kepron, W., et al.), 64
severe, provoked by sodium cromoglycate, 23 (Abst.)
Bronchodilating activity of H_1 blocker, chlorpheniramine (Popa, V. T.), 54
Bronchodilator activity of Sch 1000 and salbutamol, comparison of (Ruffin, R. E., et al.), 136
fenoterol, new, in asthma, clinical investigation of (Simi, W. W., and Miller, W. C.), 178 (Brief communication)
new anticholinergic, double-blind study of (Cervinsky, P.), 22
responsiveness, assessing (Tinkelman, D. G., et al.), 109
Bronchopulmonary aspergillosis, allergic, bronchocentric granulomatosis complication of (Hanson, G., et al.), 83
Bronchospasm, acute urticaria and, following radiographic contrast media in dog (Rosenberg, M., et al.), 339 (Brief communication)
allergen induced, protective effect of inhaled BRL 10833, 6 (Abst.)
exercise-induced, in adults, double-blind, crossover study of cromolyn sodium inhibition of, in adults, 2 (Abst.)
Bronkosol and its components, effect of, on cardiopulmonary parameters in asthmatic patients (Spector, S. L., et al.), 371

C

C1q levels in hereditary angioedema (Brasher, G. W.), 263
C3, quantitative requirements for, to induce Forssman systemic shock and cutaneous hemorrhagic vasculitis in guinea pigs (Newman, S., et al.), 327
C5a, human, comparison of partial characterization of in vitro chemotactic activity to (Robinson, L. D., et al.), 353
Calcium ionophore A23187, eosinophil chemotactic factor (ECF) release from polymorphonuclear leukocytes by, 14 (Abst.)
Candidiasis, experimental cutaneous, in guinea pigs, study of possible mechanisms of basophil accumulation in (Sohnle, P. G., and Kirkpatrick, C. H.), 171
Canine model for reaginic hypersensitivity and allergic bronchoconstriction (Kepron, W., et al.), 64
Cardiac function, ventilatory and, in asthma, effect of atenolol on, 18 (Abst.)
Cardiopulmonary parameters in asthmatic patients, effect of Bronkosol and its components on (Spector, S. L., et al.), 371
Cell(s), mast, obtained from human bronchial lumens, ultrastructural identification of (Ts'ao, C., et al.), 320
mediated immunity in children, screening for, 8 (Abst.)
Cellular cytotoxicity in asthmatics, antibody-dependent (Flaherty, D. K., et al.), 48
Chemical mediators, release of, from partially purified human lung mast cells, 26 (Abst.)
Chemotactic activity, in vivo, partial characterization of; comparison to human C5A (Robinson, L. D., et al.), 353
Chemotaxis, normal, in vitro and defective leukotaxis in vivo, hyperimmunoglobulin E syndrome with (Weston, W. L., et al.), 115
Chicken, B-cell deficient, allergic contact dermatitis in, 4 (Abst.)
Childhood asthma, alpha-1 antitrypsin in (Schwartz, R. H., et al.), 31
chronic, variation in theophylline clearance rate with time in (Leung, P., et al.), 440
clinical value of bronchial provocation testing in (Cavanaugh, M. J., et al.), 41
Chlorpheniramine, H_1 blocker, bronchodilating activity of (Popa, V. T.), 54
Chromium and cobalt, role of carrier in sensitivity to, 7 (Abst.)
Cobalt, chromium and, role of carrier in sensitivity to, 7 (Abst.)
Cockroach, immediate hypersensitivity to (Twarog, F. J., et al.), 154
Cold-induced urticaria, delayed; dominantly inherited disorder (Soter, N. A., et al.), 294
Conjunctivitis, ragweed-allergic, sodium cromoglycate in (Greenbaum, J., et al.), 437
Contact sensitization, human, inhibition of induction of, by topical glucocorticosteroids, 24 (Abst.)
Corticosteroid(s), high-dose, in severe acute asthma, 17 (Abst.)
therapy, alternate-day, effects of, on delayed hypersensitivity skin responses, 15 (Abst.)
Cortisol, beta adrenergic agonist, prostaglandins and, effect of, on lymphocyte levels of cyclic adenosine monophosphate and glycogen (Lee, T.-P., et al.), 408
histamine-sensitizing factor and, effects of, on lymphocyte adenyl cyclase responses (Lee, T.-P.), 79
Cow's milk protein intestinal intolerance, value of lymphoblast transformation test in, 19 (Abst.)
Cromolyn sodium inhibition of exercise-induced bronchospasm in adults, double-blind, cross-over study of, 2 (Abst.)
nasal solution in prophylactic treatment of pollen-induced seasonal allergic rhinitis (Handelman, N. I., et al.), 237
Cryoglobulin, PMN chemotactic inhibition associated with, 31 (Abst.)

Cyclic adenosine monophosphate response of lymphocytes in normal and asthmatic subjects to norepinephrine and salbutamol, comparison of (Makino, S., et al.), 348
Cyclophosphamide, specific acquired immune unresponsiveness to contact allergens with, in mouse, 2 (Abst.)
Cystic fibrosis, hypersensitivity to pancreatic extracts in parents of patients with (Twarog, F. J., et al.), 35
Cytotoxicity, cellular, in asthmatics, antibody-dependent (Flaherty, D. K., et al.), 48

D

Danazol, treatment of hereditary angioedema with, 25 (Abst.)
Dermatitis, allergic contact, in B-cell deficient chicken, 4 (Abst.)
reactions in man, degranulation of basophilic leukocytes in, 2 (Abst.)
and stomatitis caused by cinnamic aldehyde-flavored toothpaste, 12 (Abst.)
atopic, and IgE; relationship between changes in IgE levels and severity of disease, 31 (Abst.)
patch test reactions to human dander in, 30 (Abst.)
contact and atopic, T and B lymphocytes in, 34 (Abst.)
generalized exfoliative, from ethylenediamine, 17 (Abst.)
Dermatology, 2, 7, 12, 17, 24, 30 (Absts.)
Diphenhydramine, aerosolized H_1 receptor antagonist, effect of, in further studies on mechanism of human histamine-induced asthma (Casterline, C. L., and Evans, R., III), 420
Disease, thyroid, and asthma (Bush, R. K., et al.), 398 (Allergy grand rounds)
Dog, radiographic contrast media in, acute urticaria and bronchospasm following (Rosenberg, M., et al.), 339 (Brief communication)
Dose assessment, graded, of efficacy of beclomethasone dipropionate aerosol for severe chronic asthma (Toogood, J. H., et al.), 298
response effects of albuterol aerosol compared with isoproterenol and placebo aerosols (Spector, S. L., et al.), 280
Drug(s) containing tartrazine dye, 91, 269 (Correspondence)
effects, difficulty in distinguishing variation due to, in evaluation of bronchodilator responsiveness in asthmatic children (Tinkelman, D. G., et al.), 109
Dye, tartrazine, drugs containing, 91, 269 (Correspondence)

E

Enzyme release, neutrophil lysosomal, histamine inhibition of; H2 histamine receptor response, 8 (Abst.)
Eosinophil chemotactic factor, defective release of, from peripheral leukocytes in patients with chronic urticaria, 25 (Abst.)
release from polymorphonuclear leukocytes by calcium ionophore A23187, 14 (Abst.)
lymphokine, stimulation promoter, antigen dose response and specificity of production of, 19 (Abst.)
Epinephrine, comparison of subcutaneous terbutaline with, in treatment of asthma in children (Sly, R. M., et al.), 128
diminished plasma cyclic adenosine monophosphate response after, in asthmatic children, correlation between increased bronchial responsiveness to histamine and (Apold, J., and Aksnes, L.), 343
Erythrocyte sedimentation rate, 182 (Correspondence)
Ethylenediamine, generalized exfoliative dermatitis from, 17 (Abst.)

F

Fabricius, bursa of, lymphocyte-differentiating hormone of, 27 (Abst.)
Fenoterol, new bronchodilator, in asthma, clinical investigation of (Simi, W. W., and Miller, W. C.), 178 (Brief communication)
Flunisolide therapy, intranasal topical, in allergic rhinitis, clinical evaluation of (Kammermeyer, J. K., et al.), 287
Forssman systemic shock and cutaneous hemorrhagic vasculitis in guinea pigs, quantitative requirements for C3 to induce (Newman, S., et al.), 327

G

Glucocorticosteroids, topical, inhibition of induction of human contact sensitization by, 24 (Abst.)
Glycogen, effect of beta adrenergic agonist, prostaglandins, and cortisol on lymphocyte levels of cyclic adenosine monophosphate and (Lee, T.-P., et al.), 408
Gold salts, pulmonary fibrosis associated with hypersensitivity to, 3 (Abst.)
Granulomatosis, bronchocentric; complication of allergic bronchopulmonary aspergillosis (Hanson, G., et al.), 83
Grass allergens, polymerization of mixtures of (Patterson, R., et al.), 314
pollen–allergic patients, subclass typing of IgG antibodies formed by, during immunotherapy, 21 (Abst.)
Growth retardation, temporal, in asthmatic boys, maturational delay and (Hauspie, R., et al.), 200
Guinea pigs, quantitative requirements for C3 to induce Forssman systemic shock and cutaneous hemorrhagic vasculitis in (Newman, S., et al.), 327
study of possible mechanisms of basophil accumulation in experimental cutaneous candidiasis in (Sohnle, P. G., and Kirkpatrick, C. H.), 171

H

H_1 blocker, chlorpheniramine, bronchodilating activity of (Popa, V. T.), 54
Harvester ant sensitivity; in vitro and in vivo studies using whole body extracts and venom (Pinnas, J. L., et al.), 10
Hay fever, asthma and, 1, 5, 11, 17, 23, 29 (Absts.)
Hemocyanin antibody, anti–keyhole limpet, in normal unsensitized individuals (Burke, G. P., et al.), 309
Hemorrhagic vasculitis, cutaneous, in guinea pigs, quantitative requirements for C3 to induce Forssman systemic shock and (Newman, S., et al.), 327
Hereditary angioedema, C1q levels in (Brasher, G. W.), 263
Histamine analysis, automated, for in vitro allergy testing; correlation of skin test results with in vitro whole blood histamine release in 82 patients (Siraganian, R. P.), 214
increased bronchial responsiveness to, and diminished plasma cyclic adenosine monophosphate response after epinephrine in asthmatic children, correlation between (Apold, J., and Aksnes, L.), 343
-induced asthma, human, further studies on mechanism of (Casterline, C. L., and Evans, R., III), 420
inhibition of neutrophil lysosomal enzyme release; an H2 histamine receptor response, 8 (Abst.)
and methacholine, effect of, on nasal airway resistance in atopic and nonatopic subjects (McLean, J. A., et al.), 165
receptor–bearing peripheral T lymphocytes in patients with allergies (Verhaegen, H., et al.), 266 (Brief communication)
release, cold-evoked, induced tolerance in cold urticaria caused by, 9 (Abst.)
-sensitizing factor and cortisol, effects of, on lymphocyte adenyl cyclase responses (Lee, T.-P.), 79
Honeybee venom, melittin allergen of (Paull, B. R., et al.), 334
Hormone, lymphocyte-differentiating, of bursa of Fabricius, 27 (Abst.)
Horse serum protein allergy, high incidence of, in various autoimmune disorders (Ring, J., et al.), 185
House dust in asthmatics, twenty-four-hour rhythm in bronchial hyperreactivity to (Gervais, P., et al.), 207
hypersensitivity, IgE antibodies to house dust, mite, animal allergens, and molds in, 13 (Abst.)
mite vaccine in bronchial asthma, hyposensitization with, 23 (Abst.)
Human bronchial lumens, ultrastructural identification of mast cells obtained from (Ts'ao, C., et al.), 320

Hymenoptera hypersensitivity, diagnosis of, by skin testing with Hymenoptera venoms (Zeleznick, L. D., et al.), 2
venoms, allergens in; comparison of venom and venom sac extracts (Hoffman, D. R.), 367
Hyperimmunoglobulin E syndrome with normal chemotaxis in vitro and defective leukotaxis in vivo (Weston, W. L., et al.), 115
Hyperreactivity, bronchial, to house dust in asthmatics, twenty-four-hour rhythm in (Gervais, P., et al.), 207
Hypersensitivity, Hymenoptera, diagnosis of, by skin testing with Hymenoptera venoms (Zeleznick, L. D., et al.), 2
immediate, to cockroach (Twarog, F. J., et al.), 154
detection of, in rabbits by direct basophil degranulation (Benveniste, J., et al.), 271
to pancreatic extracts in parents of patients with cystic fibrosis (Twarog, F. J., et al.), 35
reaginic, and allergic bronchoconstriction, canine model for (Kepron, W., et al.), 64
Hyposensitization, routine, venom extract versus whole body extract for, 402 (Correspondence)

I

Immunity, cell-mediated, in children, screening for, 8 (Abst.)
Immunodeficiency, severe combined, deficiency of adenosine deaminase not associated with, 7 (Abst.)
Immunoglobulin E antibody production, prolonged, in hypersensitive mice, effect of multiple injections of antigen on (Altman, R., and Levine, B. B.), 120
atopic dermatitis and; relationship between changes in IgE levels and severity of disease, 31 (Abst.)
elevated, platelet thrombopathy in asthmatic patients with (Maccia, C. A., et al.), 101
and IgG, bee venom–specific, clinical application of measurements of serum levels of (Light, W. C., et al.), 247
metabolism of; studies in normal individuals and in patient with IgE myeloma, 21 (Abst.)
myeloma, studies in normal individuals and in patient with; metabolism of IgE, 21 (Abst.)
protein in serum and secretions, comparison of procedures for measurement of (Gleich, G. J., and Dunnette, S. L.), 377
G, IgE and, bee venom–specific, clinical application of measurements of serum levels of (Light, W. C., et al.), 247
Immunologic(al) mechanisms in pathogenesis of vinyl chloride disease, 14 (Abst.)
responses in patients with lepromatous leprosy, 20 (Abst.)
studies in vitro and in vivo of children with pollenosis given immunotherapy with aqueous and glutaraldehyde-treated tyrosine-adsorbed pollen extract, 29 (Abst.)
Immunology, 4, 9, 14, 19, 26, 33 (Absts.)
Immunopharmacologic and mecholyl challenge studies; toluene diisocyanate pulmonary disease (Butcher, B. T., et al.), 223
Immunotherapy, skin testing and, simple method for keeping allergenic extracts at temperature near 4° C during in-office use for (Van Metre, T. E., Jr.), 341 (Brief communication)
subclass typing of IgG antibodies formed by grass pollen–allergic patients during, 21 (Abst.)
Inderal (propranolol), cutaneous reactions to, 32 (Abst.)
Infection, rabies, successful protection of humans exposed to, 20 (Abst.)
Inflammatory disorders, C5a important sources of in vivo chemotactic activity in (Robinson, L. D., et al.), 353
Insect stings, unusual reactions following (Light, W. C., et al.), 391
Insulin, skin reactions to, severe persistent biphasic local (immediate and late) (deShazo, R. D., et al.), 161
Interferon and delayed-type hypersensitivity to viral antigen, 27 (Abst.)
Interferon—Cont'd
suppressive effect of, on ability of mouse spleen cells synthesizing IgE to sensitize rat skin for heterologous adaptive cutaneous anaphylaxis, 21 (Abst.)
Ipratropium bromide, new anticholinergic bronchodilator, double-blind study of (Chervinsky, P.), 22
Isoproterenol and placebo aerosols, dose-response effects of albuterol aerosol compared with (Spector, S. L., et al.), 280

L

Leprosy, lepromatous, immunologic responses in patients with, 20 (Abst.)
Leukocytes, peripheral, defective release of eosinophil chemotactic factor from, in patients with chronic urticaria, 25 (Abst.)
Leukotaxis, defective, in vivo, normal chemotaxis in vitro and, hyperimmunoglobulin E syndrone with (Weston, W. L., et al.), 115
Levamisole augmentation of lymphocyte hyporesponsiveness to phytohaemagglutinin in patients with pulmonary tuberculosis (39292), 15 (Abst.)
in vitro stimulation of neutrophil motility by, 10 (Abst.)
Limpet hemocyanin antibody, anti–keyhole, in normal unsensitized individuals (Burke, G. P., et al.), 309
Lung capacity, total, mechanism of increase in, during acute asthma, 12 (Abst.)
disease, tolbutamide induced diffuse; case report, 14 (Abst.)
mast cells, partially purified human, release of chemical mediators from, 26 (Abst.)
Lymphoblast transformation test, value of, in cow's milk protein intestinal intolerance, 19 (Abst.)
Lymphocyte(s) adenyl cyclase responses, effects of histamine-sensitizing factors and cortisol on (Lee, T.-P.), 79
histamine receptor–bearing peripheral T, in patients with allergies (Verhaegen, H., et al.), 266 (Brief communication)
levels of cyclic adenosine monophosphate and glycogen, effect of beta adrenergic agonist, prostaglandins, and cortisol on (Lee, T.-P., et al.), 408
responses to purified ragweed allergens in vitro; proliferative responses in normal, newborn, agammaglobulinemic, and atopic subjects (Buckley, R. H., et al.), 70
T and B, in contact and atopic dermatitis, 34 (Abst.)
Lymphoid cell surface receptors, development of, 269 (Correspondence)
Lymphokine eosinophil stimulation promoter, antigen dose response and specificity of production of, 19 (Abst.)
Lymphopenia in acute nitrofurantoin pleuropulmonary reactions (Geller, M., et al.), 445

M

Mast cells obtained from human bronchial lumens, ultrastructural identification of (Ts'ao, C., et al.), 320
Maturational delay and temporal growth retardation in asthmatic boys (Hauspie, R., et al.), 200
Measles, defective neutrophil motility in children with, 4 (Abst.)
outbreak among adolescents, 24 (Abst.)
Mecholyl challenge studies, immunopharmacologic and; toluene diisocyanate pulmonary disease (Butcher, B. T., et al.), 223
Melittin; allergen of honeybee venom (Paull, B. R., et al.), 334
Mesquite pollen, an aeroallergen in asthma and allergic rhinitis (Novey, H. S., et al.), 359
Methacholine, histamine and, effect of, on nasal airway resistance in atopic and nonatopic subjects (McLean, J. A., et al.), 165
Mice, hypersensitive, effect of multiple injections of antigen on prolonged IgE antibody production in (Altman, R., and Levine, B. B.), 120
Miscellaneous allergies, 9 (Absts.)
Mouse, reaginic antibody formation in. VIII. Depression of ongoing IgE antibody formation by suppressor T cells, 33 (Abst.)

Mouse—Cont'd
specific acquired immune unresponsiveness to contact allergens with cyclophosphamide in, 2 (Abst.)
spleen cells synthesizing IgE, suppressive effect of interferon on ability of, to sensitize rat skin for heterologous adaptive cutaneous anaphylaxis, 21 (Abst.)
Myeloma, IgE, studies in normal individuals and in patients with, 21 (Abst.)

N

Nasal airway resistance in atopic and nonatopic subjects, effect of histamine and methacholine on (McLean, J. A., et al.), 165
desensitization, local, provoking systemic illness with proteinuria, 12 (Abst.)
polyps in asthma and rhinitis (Settipane, G. A., and Chafee, F. H.), 17
solution, cromolyn sodium, in prophylactic treatment of pollen-induced seasonal allergic rhinitis (Handelman, N. I., et al.), 237
stenosis induced by allergen, effect of new anti-allergic drug KC 74,917, given by aerosol, on, 16 (Abst.)
Neutrophil motility, defective, in children with measles, 4 (Abst.)
by levamisole, in vitro stimulation of, 10 (Abst.)
Nitrofurantoin pleuropulmonary reactions, acute, lymphopenia in (Geller, M., et al.), 445
Norepinephrine and salbutamol, comparison of cyclic adenosine monophosphate response of lymphocytes in normal and asthmatic subjects to (Makino, S., et al.), 348

O

Ophthalmic sulfonamide, Stevens-Johnson syndrome from, 24 (Abst.)
Otorhinology and otolaryngology, 16, 22, 28 (Absts.)

P

Pancreatic extracts, hypersensitivity to, in parents of patients with cystic fibrosis (Twarog, F. J., et al.), 35
Patch test reactions to human dander in atopic dermatitis, 30 (Abst.)
Pathology, pharmacology, physiology, and, 8, 12, 18, 25, 32 (Abst.)
Pediatrics, 7, 24, 31 (Absts.)
Pharmacokinetics of theophylline in children with asthma, 18 (Abst.)
Pharmacology, physiology, and pathology, 8, 12, 18, 25, 32 (Abst.)
Photosensitivity, sweat droplet in testing for; pathogenesis of solar urticaria, 30 (Abst.)
Physiology, pharmacology, and pathology, 8, 12, 18, 25, 32 (Abst.)
Pigeon breeders' sera, detection of IgG antibodies against pigeon intestinal mucosa antigens in, using immunofluorescent technique, 9 (Abst.)
Placebo aerosols, isoproterenol and, dose-response effects of albuterol aerosol compared with (Spector, S. L., et al.), 280
Plasma cyclic adenosine monophosphate response after epinephrine in asthmatic children, correlation between increased bronchial responsiveness to histamine and (Apold, J., and Aksnes, L.), 343
Platelet thrombopathy in asthmatic patients with elevated immunoglobulin E (Maccia, C. A., et al.), 101
Pleuropulmonary reactions, acute nitrofurantoin, lymphopenia in (Geller, M., et al.), 445
PMN chemotactic inhibition associated with cryoglobulin, 31 (Abst.)
Pollen aerobiology, allergy diagnosis and treatment in migrant population of United States derived from review of selected aspects of (Schatz, M.), 254
extract, aqueous and glutaraldehyde-treated tyrosine-adsorbed, immunological studies in vitro and in vivo of children with pollenosis given immunotherapy with, 29 (Abst.)
Pollen—Cont'd
induced seasonal allergic rhinitis, cromolyn sodium nasal solution in prophylactic treatment of (Handelman, N. I., et al.), 237
mesquite, aeroallergen in asthma and allergic rhinitis (Novey, H. S., et al.), 359
ragweed, role of, in autumnal asthma (Bruce, C. A., et al.), 449
Polymerization of mixtures of grass allergens (Patterson, R., et al.), 314
Presidential address (Patterson, R.), 405
Properdin, alternative pathway of complement activation in respiratory secretions, evidence for presence of components of, 33 (Abst.)
Propranolol (Inderal), cutaneous reactions to, 32 (Abst.)
Prostaglandin(s), beta adrenergic agonist, and cortisol, effect of, on lymphocyte levels of cyclic adenosine monophosphate and glycogen (Lee, T.-P., et al.), 408
$F_2\alpha$, inhaled, bronchial response to, in patients with common or aspirin-sensitive asthma (Orehek, J., et al.), 414
Protein allergy, horse serum, high incidence of, in various autoimmune disorders (Ring, J., et al.), 185
IgE, in serum and secretions, comparison of procedures for measurement of (Gleich, G. J., and Dunnette, S. L.), 377
Proteinuria, local nasal desensitization provoking systemic illness with, 12 (Abst.)
Pulmonary disease, toluene diisocyanate; immunopharmacologic and mecholyl challenge studies (Butcher, B. T., et al.), 223
fibrosis associated with hypersensitivity to gold salts, 3 (Abst.)

R

Rabbit(s), detection of immediate hypersensitivity in, by direct basophil degranulation (Benveniste, J., et al.), 271
experimental studies of sensitization to beryllium, zirconium, and aluminum compounds in (Kang, K.-Y., et al.), 425
Rabies, infection, successful protection of humans exposed to, 20 (Abst.)
Radiographic contrast media in dog, acute urticaria and bronchospasm following (Rosenberg, M., et al.), 339 (Brief communication)
Ragweed allergens, purified, in vitro, lymphocyte responses to; proliferative responses in normal, newborn, agammaglobulinemic, and atopic subjects (Buckley, R. H., et al.), 70
allergic conjunctivitis, sodium cromoglycate in (Greenbaum, J., et al.), 437
allergy, comparison of polymerized and unpolymerized antigen E for immunotherapy of, 11 (Abst.)
histologic responses in human skin test reactions to; effects of single intravenous injection of steroids (Dunsky, E. H., et al.), 142
immunotherapy, perennial, studies of (Irons, J. S., et al.), 190
pollen, role of, in autumnal asthma (Bruce, C. A., et al.), 449
Rat skin, suppressive effect of interferon on ability of mouse spleen cells synthesizing IgE to sensitize for heterologous adaptive cutaneous anaphylaxis, 21 (Abst.)
Reaction(s), acute nitrofurantoin pleuropulmonary, lymphopenia in (Geller, M., et al.), 445
skin, to insulin, severe persistent biphasic local (immediate and late) (deShazo, R. D., et al.), 161
unusual, following insect stings (Light, W. C., et al.), 391
Reaginic hypersensitivity and allergic bronchoconstriction, canine model for (Kepron, W., et al.), 64
Respiratory secretions, evidence for presence of components of alternative (properdin) pathway of complement activation in, 33 (Abst.)
Rhinitis, allergic, asthma and, mesquite pollen aeroallergen in (Novey, H. S., et al.), 359
intranasal topical flunisolide therapy in, clinical evaluation of (Kammermeyer, J. K., et al.), 287
large airway constriction in (Fairshter, R. D., et al.), 243
recurrent staphylococcal abscesses associated with defective neutrophil chemotaxis and, 16 (Abst.)

Rhinitis, allergic—Cont'd
relative value of peripheral blood, secretion and tissue eosinophilia in diagnosis of patterns of, 22 (Abst.)
asthma and, nasal polyps in (Settipane, G. A., and Chafee, F. H.), 17
perennial, beclomethasone dipropionate aerosol in (Tarlo, S. M., et al.), 232
intranasal steroid aerosol in; comparison with antihistamine compound, 28 (Abst.)
pollen-induced seasonal allergic, cromolyn sodium nasal solution in prophylactic treatment of (Handelman, N. I., et al.), 237

S

Salbutamol, norepinephrine and, comparison of cyclic adenosine monophosphate response of lymphocytes in normal and asthmatic subjects to (Makino, S., et al.), 348
Sch 1000 and, comparison of bronchodilator activity of (Ruffin, R. E., et al.), 136
Sch 1000 and salbutamol, comparison of bronchodilator activity of (Ruffin, R. E., et al.), 136
Sedimentation rate, erythrocyte, 182 (Correspondence)
Sepharose beads, allergen-coated, demonstration of reaginic antibodies on human basophils by immune adherence to, 33 (Abst.)
Serum antigen-binding capacity, total, associated changes in cellular responsiveness, specific IgE antibody concentrations, and, in studies of perennial ragweed immunotherapy (Irons, J. S., et al.), 190
horse, protein allergy, high incidence of, in various autoimmune disorders (Ring, J., et al.), 185
levels of bee venom–specific IgE and IgG, clinical application of measurements of (Light, W. C., et al.), 247
and secretions, comparison of procedures for measurement of IgE protein (Gleich, G. J., and Dunnette, S. L.), 377
Skin reactions to insulin, severe persistent biphasic local (immediate and late) (deShazo, R. D., et al.), 161
responses, delayed hypersensitivity, effects of alternate-day corticosteroid therapy on, 15 (Abst.)
test reactions to ragweed, human, histologic responses in; effects of single intravenous injection of steroids (Dunsky, E. H., et al.), 142
results, correlation of, with in vitro whole blood histamine release in 82 patients (Siraganian, R. P.), 214
testing and immunotherapy, simple method for keeping allergenic extracts at temperature near 4° C during in-office use for (Van Metre, T. E., Jr.), 341 (Brief communication)
Sodium cromoglycate in ragweed-allergic conjunctivitis (Greenbaum, J., et al.), 437
severe bronchoconstriction provoked by, 23 (Abst.)
Solar urticaria, pathogenesis of; sweat droplet in testing for photosensitivity, 30 (Abst.)
Staphylococcal abscesses, recurrent, associated with defective neutrophil chemotaxis and allergic rhinitis, 16 (Abst.)
Stenosis, nasal, induced by allergen, effect on, of new antiallergic drug ICI 74,917, given by aerosol, 16 (Abst.)
Steroid(s), aerosol, intranasal, in perennial rhinitis; comparison with antihistamine compound, 28 (Abst.)
effects of single intravenous injection of; histologic responses in human skin test reactions to ragweed (Dunsky, E. H., et al.), 142
topically applied, tachyphylaxis to, 31 (Abst.)
Stevens-Johnson syndrome from ophthalmic sulfonamide, 24 (Abst.)
Stings, insect, unusual reactions following (Light, W. C., et al.), 391
Stomatitis, allergic contact dermatitis and, caused by cinnamic aldehyde-flavored toothpaste, 12 (Abst.)

T

T lymphocytes, histamine receptor–bearing peripheral, in patients with allergies (Verhaegen, H., et al.), 266 (Brief communication)
Tachyphylaxis to topically applied steroids, 31 (Abst.)
Tartrazine, acetylsalicylic acid (ASA) and, in patients with asthma, hypersensitivity to, 5 (Abst.)
dye, drugs containing, 91, 269 (Correspondence)
Terbutaline, lack of bronchial beta adrenoceptor resistance in asthmatics during long-term treatment with (Larsson, S., et al.), 93
subcutaneous, comparison of, with epinephrine in treatment of asthma in children (Sly, R. M., et al.), 128
subsensitivity of beta responses during therapy with (Jenne, J. W., et al.), 383
Theophylline clearance rate, variation in, with time in chronic childhood asthma (Leung, P., et al.), 440
by troleandomycin, inhibition of (Weinberger, M., et al.), 228
pharmacokinetics of, in children with asthma, 18 (Abst.)
Thrombopathy, platelet, in asthmatic patients with elevated immunoglobulin E (Maccia, C. A., et al.), 101
Thyroid disease and asthma (Bush, R. K., et al.), 398 (Allergy grand rounds)
Tolbutamide induced diffuse lung disease; case report, 14 (Abst.)
Toluene di-isocyanate, asthma due to nonoccupational exposure to, 1 (Abst.)
pulmonary disease; immunopharmacologic and mecholyl challenge studies (Butcher, B. T., et al.), 223
Troleandomycin, inhibition of theophylline clearance by (Weinberger, M., et al.), 228
Tuberculosis, pulmonary (39292), levamisole augmentation of lymphocyte hyporesponsiveness to phytohaemagglutinin in patients with, 15 (Abst.)

U

Urticaria, acute, and bronchospasm following radiographic contrast media in dog (Rosenberg, M., et al.), 339 (Brief communication)
chronic, defective release of eosinophil chemotactic factor from peripheral leukocytes in patients with, 25 (Abst.)
and intermittent anaphylaxis, 9 (Abst.)
cold, induced tolerance in, caused by cold-evoked histamine release, 9 (Abst.)
delayed cold-induced; dominantly inherited disorder (Soter, N. A., et al.), 294

V

Vaccine, house dust mite, in bronchial asthma, hyposensitization with, 23 (Abst.)
Vasculitis, cutaneous hemorrhagic, in guinea pigs, quantitative requirements for C3 to induce Forssman systemic shock and (Newman, S., et al.), 327
Venom(s), bee, allergens in; identification of allergen B of bee venom as acid phosphatase (Hoffman, D. R.), 364
two new high molecular weight allergenic specificities (Hoffman, D. R., et al.), 147
extract versus whole body extract for routine hyposensitization, 402 (Correspondence)
honeybee, melittin allergen of (Paull, B. R., et al.), 334
Hymenoptera, allergens in; comparison of venom and venom sac extracts (Hoffman, D. R.), 367
diagnosis of Hymenoptera hypersensitivity by skin testing with Hymenoptera venoms (Zeleznick, L. D., et al.), 2
whole body extracts and, in vitro and in vivo studies using; harvester ant sensitivity (Pinnas, J. L., et al.), 10
Vinyl chloride disease, immunological mechanisms in pathogenesis of, 14 (Abst.)

W

Whole body extracts and venom, in vitro and in vivo studies using; harvester ant sensitivity (Pinnas, J. L., et al.), 10

Z

Zirconium, beryllium, and aluminum compounds in rabbit, experimental studies of sensitization to (Kang, K.-Y., et al.), 425

Subject index

A

Acetylsalicylic acid, effect of, regulatory role of prostaglandin E in allergic histamine release with observations on responsiveness of basophil leukocytes and (Okazaki, T., et al.), 360

Acid, tranexamic; preoperative prophylactic therapy for patients with hereditary angioneurotic edema (Sheffer, A. L., et al.), 38

Acinetobacter infections, room humidifiers as source of, 6 (Abst.)

Adenosine monophosphate, cyclic, absence of effect of ephedrine on levels of (Lee, T.-P., and Reed, C. E.), 141

Adenovirus infection, severe disseminated, successfully treated with thymic humoral factor, THF, 26 (Abst.)

Adenylate cyclase activity, drug-induced changes of, in cells from asthmatic and nonasthmatic subjects (Kalisker, A., et al.), 259

Aerometric studies of fungi, comparative merits of eight popular media in (Burge, H. P., et al.), 199

Aerosol, beclomethasone, determinants of response to, at various dosage levels; multiple regression analysis to identify clinically useful predictors (Toogood, J. H., et al.), 367

triamcinolone acetonide, oropharyngeal candidiasis in patients treated with (Pingleton, W. W., et al.), 254

Aerosolized atropine sulfate and SCH 1000, comparison of, on exercise-induced bronchospasm in children (Borut, T. C., et al.), 127

Aging, IgE mediated hypersensitivity in, 26 (Abst.)

Airway conductance, effect of deep inspiration on, in subjects with allergic rhinitis and allergic asthma (Fish, J. E., et al.), 41

mucosal permeability in *Ascaris suum*–sensitive rhesus monkey (Boucher, R. C., et al.), 134

Allergen(s), cat, IgE antibody to, in allergic population (Ohman, J. L., Jr., et al.), 317

injection therapy with glutaraldehyde-modified—ragweed pollen–tyrosine adsorbate (Crockcroft, D. W., et al.), 56

reactivity of bronchi to; relationship of bronchial histamine reactivity to, 1 (Abst.)

Allergenic fraction of honeybee venom, high molecular weight (Karpas, A. B., et al.), 155

potency of bee antigens measured by RAST inhibition, 3 (Abst.)

Allergic bronchopulmonary aspergillosis, acute, circulating immune complexes and activation of complement sequence in (Geha, R. S.), 357

granulomatosis and angiitis (Churg-Strauss syndrome), 24 (Abst.)

histamine release, regulatory role of prostaglandin E in, with observations on responsiveness of basophil leukocytes and effect of acetylsalicylic acid (Okazaki, T., et al.), 360

population, incidence of IgG short-term sensitizing antibodies in (Nelson, H. S., et al.), 266

reactions, inhibition of, by cromoglycate and by new antiallergic drug; activity in rats, 30 (Abst.)

reactivity, evaluation of antigen-induced buffy coat leucocyte aggregation as simple test of, 26 (Abst.)

responses, late cutaneous, relative refractory state for (Shaikh, W., et al.), 242

rhinitis and allergic asthma, effect of deep inspiration on airway conductance in subjects with (Fish, J. E., et al.), 41

skin testing; clinical investigation (Imber, W. E.), 47

Allergist, expanding role of, in clinical immunology (Bloch, K. J.), 144 (Requested manuscript)

Allergy(ies), food, and atopic dermatitis, estimation of IgG, IgA and IgE antibodies to food antigens in children with; clinical and immunological aspects of food allergy in childhood, 8 (Abst.)

-Immunology Listings, 69

miscellaneous, 3, 20, 25 (Absts.)

penicillin, specific and total serum IgE measurements in diagnosis of, 25 (Abst.)

societies, listing of state, regional, and local, and presidents as of March, 1977, 89

Alternaria and *Aspergillus*, pulmonary hypersensitivity to, in baker's asthma, 29 (Abst.)

Aminophylline and salbutamol, intravenous, comparison of, in severe asthma, 14 (Abst.)

Ampicillin in man; adverse effects, 2 (Abst.)

Anaphylactic sensitization prevention of homocytotropic antibody formation and, by prefeeding antigen (David, M. F.), 180

Anaphylaxis, human lung tissue and; role of cyclic GMP as modulator of immunologically induced secretory process (Kaliner, M.), 204

Angiitis, allergic granulomatosis and (Churg-Strauss syndrome), 24 (Abst.)

Angioedema, urticaria and, mediators of (Kaplan, A. P.), 324 (Requested manuscript)

Angioneurotic edema, hereditary, preoperative prophylactic therapy for patients with; tranexamic acid (Sheffer, A. L., et al.), 38

Anhydride–induced airway syndromes, trimellitic: clinical and immunologic studies (Zeiss, C. R., et al.), 96

Announcements, 92, 152, 212

Antibody(ies), anti-DNA, from SLE patients, in vitro activity of, in antibody-dependent cell-mediated cytotoxicity, 21 (Abst.)

antiribonucleoprotein, in connective tissue diseases; estimation by counterimmunoelectrophoresis, 19 (Abst.)

-dependent cellular cytotoxicity to target cells infected with herpes simplex viruses; functional adequacy in neonate, 4 (Abst.)

dextran reactive, role of; dextran-induced anaphylactoid reactions in man, 20 (Abst.)

formation, homocytotropic, and anaphylactic sensitization, prevention of, by prefeeding antigen (David, M. F.), 180

IgE, measurement of absolute levels of, in patients with ragweed hay fever (Gleich, G. J., et al.), 188

IgG short-term sensitizing, incidence of, in allergic population (Nelson, H. S., et al.), 266

level, preseasonal IgE ragweed, as predictor of response to therapy of ragweed hay fever with intranasal cromolyn sodium solution (Welsh, P. W., et al.), 104

responses, homocytotropic, inhibition of, in adult inbred mice by previous feeding of specific antigen (Vaz, N. M., et al.), 110

specific IgE, development of, after immunization with tetanus-diphtheria (Td) toxoids; IgE synthesis in man, 16 (Abst.)

in nasal secretion from patients with allergic rhinitis and with negative or weakly positive RAST on serum, 32 (Abst.)

Antigen(s), bee, allergenic potency of, measured by RAST inhibition, 3 (Abst.)

histamine and selected, circadian rhythms in cutaneous reactivity to, including phase relationship to urinary cortisol excretion, 14 (Abst.)

induced buffy coat leucocyte aggregation as simple test of allergic reactivity, evaluation of, 26 (Abst.)

July, pp. 1-92; August, pp. 93-152; September, pp. 153-212; October, pp. 213-272; November, pp. 273-332; December, pp. 333-402.

Abstracts: July, pp. 1-6; August, pp. 7-12; September, pp. 13-16; October, pp. 17-22; November, pp. 23-28; December, pp. 29-32.

Antigen(s)—Cont'd
prevention of homocytotropic antibody formation and anaphylactic sensitization by prefeeding (David, M. F.), 180
protein, induction of delayed hypersensitivity to, in mice without Freund adjuvants (Crowle, A. J., et al.), 14
specific, inhibition of homocytotropic antibody responses in adult inbred mice by previous feeding of (Vaz, N. M., et al.), 110
W4 and W6, frequency of, in perennial, nonallergic asthmatics (Flaherty, D. K., et al.), 236
Asbestos, activation of alternative complement pathway and generation of chemotactic factors by (Wilson, M. R., et al.), 218
Ascaris suum–sensitive rhesus monkey, airway mucosal permeability in (Boucher, R. C., et al.), 134
Aspergillosis, acute allergic bronchopulmonary, circulating immune complexes and activation of complement sequence in (Geha, R. S.), 357
Aspergillus, *Alternaria* and, pulmonary hypersensitivity to, in baker's asthma, 29 (Abst.)
Aspirin and tartrazine oral challenge; incidence of adverse response in chronic childhood asthma (Vedanthan, P. K., et al.), 8
Asthma, allergic, allergic rhinitis and, effect of deep inspiration on airway conductance in subjects with (Fish, J. E., et al.), 41
baker's, pulmonary hypersensitivity to *Alternaria* and *Aspergillus* in, 29 (Abst.)
bronchial, chronic eosinophilic pneumonia followed by polyarteritis nodosa complicating course of (Cogen, F. C., et al.), 377
hyper-M-immunoglobulinemia in children with, 27 (Abst.)
relationship of plasma histamine to activity of (Simon, R. A., et al.), 312
and chronic bronchitis, comparison of beta adrenergic function in (Jenne, J. W., et al.), 346
chronic childhood, incidence of adverse response in; aspirin and tartrazine oral challenge (Vedanthan, P. K., et al.), 8
treatment of, with beclomethasone dipropionate aerosol; double-blind crossover trial in nonsteroid–dependent patients, 19 (Abst.)
clinical utility of behavior therapy as adjunctive treatment for (Miklich, D. R., et al.), 285
due to inhaled chemical agents—fumes from "Multicore" soldering flux and colophony resin, 7 (Abst.)
and eczema, children with, lenticular complications of long-term steroid therapy in children with (Sevel, D., et al.), 215
exercise-induced, in children and preadolescents, effects of dry and humid climates on (Bar-Or, O., et al.), 163
and hay fever, 1, 7, 13, 17, 29 (Absts.)
"late onset" immunopathology of bronchial mucosa in, 29 (Abst.)
occupational, caused by low molecular weight chemical agents (Davies, R. J., et al.), 93 (Editorial)
patients with, analysis of sudden deaths and ventilatory arrests in hospital, 17 (Abst.)
phthalic anhydride, 7 (Abst.)
psychology, behavior, and treatment of (Graham, D.), 273 (Editorial)
severe, comparison of intravenous aminophylline and salbutamol in, 14 (Abst.)
in South Bronx; clinical and epidemiologic characteristics (Karetzky, M. S.), 383
Asthmatic(s) children and adolescents, hospitalized, double-blind evaluation of use of nebulized metaproterenol and isoproterenol in (Garra, B., et al.), 63
terbutaline and ephedrine in, 23 (Abst.)
and nonasthmatic subjects, drug-induced changes of adenylate cyclase activity in cells from (Kalisker, A., et al.), 259
methacholine and physostigmine airway reactivity in (Miller, M. M., et al.), 116
Asthmatic(s)—Cont'd
perennial, nonallergic, frequency of W4 and W6 antigens in (Flaherty, D. K., et al.), 236
Atopic children, lymphocyte subpopulations of, and effect of therapy upon them (Saraclar, Y., et al.), 301
dermatitis, abnormalities of leukotaxis in (Snyderman, R., et al.), 121
Atropine sulfate, aerosolized, and SCH 1000, comparison of, on exercise-induced bronchospasm in children (Borut, T. C., et al.), 127
Autoimmunization, immunologic basis of (Schwartz, R. S.), 69 (Requested manuscript)

B

Baker's asthma, pulmonary hypersensitivity to *Alternaria* and *Aspergillus* in, 29 (Abst.)
Basophil(s), complement-mediated release of histamine from; possible regulatory role of microtubules and microfilaments (Grant, J. A., et al.), 306
eosinophils and, new syndrome characterized by absence of, 31 (Abst.)
leukocytes and effect of acetylsalicylic acid, regulatory role of prostaglandin in observations on responsiveness of (Okazaki, T., et al.), 360
Beclomethasone aerosol, determinants of response to, at various dosage levels; multiple regression analysis to identify clinically useful predictors (Toogood, J. H., et al.), 367
dipropionate aerosol, treatment of chronic childhood asthma; double-blind crossover trial in nonsteroid–dependent patients, 19 (Abst.)
and sodium cromoglycate, prospective study of respiratory infection in asthmatic patients treated with, 17 (Abst.)
Bee antigens, allergenic potency of, measured by RAST inhibition, 3 (Abst.)
Behavior, psychology, and treatment of asthma (Graham, D. T.), 273 (Editorial)
therapy as adjunctive treatment of asthma, clinical utility of (Miklich, D. R., et al.), 285
Behçet's syndrome, immune complexes in, and recurrent oral ulceration, 31 (Abst.)
Beta adrenergic function in asthma and chronic bronchitis, comparison of (Jenne, J. W., et al.), 346
Bronchial asthma, chronic eosinophilic pneumonia followed by polyarteritis nodosa complicating course of (Cogen, F. C., et al.), 377
hyper-M-immunoglobulinemia in children with, 27 (Abst.)
relationship of plasma histamine to activity of (Simon, R. A., et al.), 312
histamine reactivity; its relationship to reactivity of bronchi to allergens, 1 (Abst.)
lavage fluid, histamine-containing cells in; ultrastructural characterization and comparison with mast cells in three types of tissue in rhesus monkeys, 30 (Abst.)
mucosa, immunopathology of, in "late onset" asthma, 29 (Abst.)
Bronchitis, chronic, asthma and, comparison of beta adrenergic function in (Jenne, J. W., et al.), 346
Bronchopulmonary aspergillosis, acute allergic, circulating immune complexes and activation of complement sequence in (Geha, R. S.), 357
Bronchospasm, exercise-induced, in children, comparison of aerosolized atropine sulfate and SCH 1000 on (Borut, T. C., et al.), 127

C

Candidiasis, disseminated, in previously healthy girl; implication of leukocyte candidacidal defect, 11 (Abst.)
oropharyngeal, in patients treated with triamcinolone acetonide aerosol (Pingleton, W. W., et al.), 254
Carbuterol and metaproterenol, metabolic and cardiovascular effects of (Sanders, J. P., et al.), 174

Cardiovascular effects, metabolic and, of carbuterol and metaproterenol (Sanders, J. P., et al.), 174
Cat allergens, IgE antibody to, in allergic population (Ohman, J. L., Jr., et al.), 317
Chemical agents, low molecular weight, occupational asthma caused by (Davies, R. J., et al.), 93 (Editorial)
Chemotactic factors, activation of alternative complement pathway and generation of, by asbestos (Wilson, M. R., et al.), 218
Children, exercise-induced bronchospasm in, comparison of aerosolized atropine sulfate and SCH 1000 on (Borut, T. C., et al.), 127
Churg-Strauss syndrome, 24 (Abst.)
Circadian rhythms in cutaneous reactivity to histamine and selected antigens, including phase relationship to urinary cortisol excretion, 14 (Abst.)
Climates, dry and humid, effects of, on exercise-induced asthma in children and preadolescents (Bar-Or, O., et al.), 163
Clinical and epidemiologic characteristics of asthma in South Bronx (Karetzky, M. S.), 383
  history and skin testing with penicilloyl-polylysine and penicillin G, value of; evaluation of penicillin hypersensitivity (Green, G. R., et al.), 339
  immunology, expanding role of allergist in (Bloch, K. J.), 144 (Requested manuscript)
  patterns of hypersensitivity to nonsteroidal anti-inflammatory drugs and their pathogenesis (Szczeklik, A., et al.), 276
  utility of behavior therapy as adjunctive treatment for asthma (Miklich, D. R., et al.), 285
Complement-mediated release of histamine from human basophils; possible regulatory role of microtubules and microfilaments (Grant, J. A., et al.), 306
  pathway, alternative, activation of, and generation of chemotactic factors by asbestos (Wilson, M. R., et al.), 218
  sequence, circulating immune complexes and activation of, in acute allergic bronchopulmonary aspergillosis (Geha, R. S.), 357
Complexes, immune, in Behçet's syndrome and recurrent oral ulceration, 31 (Abst.)
Conconavalin-A–stimulated human lymphocytes, leucocyte migration inhibitory activity of, 5 (Abst.)
Cooke, Robert A., Memorial Lecture (Krause, R. M.), 1
Corticosteroids, effects of, on alveolar macrophage cytotoxic effector cell function; immunologic reactivity of lung, 4 (Abst.)
Cortisol excretion, urinary, circadian rhythms in cutaneous reactivity to histamine and selected antigens, including phase relationship to, 14 (Abst.)
Counterimmunoelectrophoresis, estimation of antiribonucleoprotein antibodies in connective tissue diseases by, 19 (Abst.)
Cromoglycate, inhibition of allergic reactions by, and by new anti-allergic drug; activity in rats, 30 (Abst.)
Cromolyn sodium solution, intranasal, preseasonal IgE ragweed antibody level as predictor of response to therapy of ragweed hay fever with (Welsh, P. W., et al.), 104
Cryoglobulinaemia, monoclonal, acute anuric glomerulonephritis in, 16 (Abst.)
Cutaneous allergic responses, relative refractory state for (Shaikh, W., et al.), 242
Cyclic adenosine monophosphate, absence of effect of ephedrine on levels of, in human lymphocytes (Lee, T.-P., and Reed, C. E.), 141
  GMP as modulator of immunologically induced secretory process, role of; human lung tissue and anaphylaxis (Kaliner, M.), 204
Cytoplasmic organelles of eosinophils; eosinophil, new aspects of structure and function (Gleich, G. J.), 73 (Requested manuscript)
Cytotoxicity, antibody-dependent cell-mediated, in vitro activity of anti-DNA antibodies from SLE patients in, 21 (Abst.)

D

Dermatitis, atopic, abnormalities of leukotaxis in (Snyderman, R., et al.), 121
  food allergy and, estimation of IgG, IgA and IgE antibodies to food antigens in children with; clinical and immunological aspects of food allergy in childhood, 8 (Abst.)
  and dermatosis, serum IgE in; analysis of 497 cases, 14 (Abst.)
  hand, immediate hypersensitivity in; role of food-contact dermatitis, 2 (Abst.)
  herpetiformis, HLA-B8 and, in patients with IgA deposits in skin, 9 (Abst.)
Dermatology, 2, 8, 14, 23 (Absts.)
Dermatosis, dermatitis and, serum IgE in; analysis of 497 cases, 14 (Abst.)
Dextran-induced anaphylactoid reactions in man; role of dextran reactive antibodies, 20 (Abst.)
Diarrhea, chronic, recurrent episodes of, otitis media and, defective neutrophil chemotactic responses in patients with, 15 (Abst.)
Diphtheria and tetanus toxoids, relationship between cutaneous delayed hypersensitivity and cell-mediated immunity in vitro responses assessed by (Galant, S. P., et al.), 247
Disodium cromoglycate and *Picrorrhiza kurroa* root powder, effect of, on sensitivity of guinea pigs to histamine and sympathomimetic amines, 15 (Abst.)
Dosage levels, various, determinants of response to beclomethasone aerosol at; multiple regression analysis to identify clinically useful predictors (Toogood, J. H., et al.), 367
Drug(s)-induced changes of adenylate cyclase activity in cells from asthmatic and nonasthmatic subjects (Kalisker, A., et al.), 259
  nonsteroidal anti-inflammatory, and their pathogenesis, clinical patterns of hypersensitivity to (Szczeklik, A., et al.), 276

E

Eczema, asthma and, lenticular complications of long-term steroid therapy in children with (Sevel, D., et al.), 215
  atopic, treatment of, in children, 23 (Abst.)
Edema, hereditary angioneurotic, preoperative prophylactic therapy for patients with; tranexamic acid (Sheffer, A. L., et al.), 38
Eosinophil(s) and basophils, new syndrome characterized by absence of, 31 (Abst.)
  new aspects of structure and function (Gleich, G. J.), 73 (Requested manuscript)
  responses, tissue, factors in, in human immediate hypersensitivity reactions, 20 (Abst.)
Eosinophilic pneumonia, chronic, followed by polyarteritis nodosa complicating course of bronchial asthma (Cogen, F. C., et al.), 377
Ephedrine, absence of effect of, on levels of cyclic adenosine monophosphate in human lymphocytes (Lee, T.-P., and Reed, C. E.), 141
  terbutaline and, in asthmatic children, 23 (Abst.)
Epidemiologic characteristics, clinical and, of asthma in South Bronx (Karetzky, M. S.), 383
E-rosette test, active; sensitive in vitro correlate for human delayed-type hypersensitivity, 12 (Abst.)
Erythromycin, administration of, to patients on theophylline, 149 (Correspondence)
Exercise-induced asthma in children and preadolescents, effects of dry and humid climates on (Bar-Or, O., et al.), 163
  bronchospasm in children, comparison of aerosolized atropine sulfate and SCH 1000 on (Borut, T. C., et al.), 127
Extracts used in immunoprecipitin tests, variability of (Fink, J. N., et al.), 238

F

Farmer's lung disease, correlation of exposure to various respiratory pathogens with (Marx, J. J., Jr., et al.), 169

Fetuin; in vitro effect on sheep erythrocyte rosette formation with human T lymphocytes, 22 (Abst.)
Food allergy, effect of orally administered sodium cromoglycate on symptoms of, 18 (Abst.)
contact dermatitis, role of; immediate hypersensitivity in hand dermatitis, 2 (Abst.)
Freund adjuvants, induction of delayed hypersensitivity to protein antigens in mice without (Crowle, A. J., et al.), 14
Fungi, aerometric studies of, comparative merits of eight popular media in (Burge, H. P., et al.), 199

G

Glomerulonephritis, acute anuric, in monoclonal cryoglobulinaemia, 16 (Abst.)
Glucocorticoids, adrenal, study of effects of systemic administration of, in experimental model of hypersensitivity pneumonitis, 10 (Abst.)
Glutaraldehyde-modified—ragweed pollen–tyrosine adsorbate, allergen injection therapy with (Cockcroft, D. W., et al.), 56
Granulomatosis, allergic, and angiitis (Churg-Strauss syndrome), 24 (Abst.)

H

Hair bleach reactions, persulfate; cutaneous and respiratory manifestations, 2 (Abst.)
Hand dermatitis, immediate hypersensitivity in; role of food-contact dermatitis, 2 (Abst.)
Hay fever, asthma and, 1, 7, 13, 17 (Absts.)
ragweed, measurement of absolute levels of IgE antibodies in patients with (Gleich, G. J., et al.), 188
preseasonal IgE ragweed antibody level as predictor of response to therapy of, with intranasal cromolyn sodium solution (Welsh, P. W., et al.), 104
Hereditary angioneurotic edema, preoperative prophylactic therapy for patients with; tranexamic acid (Sheffer, A. L., et al.), 38
Herpes simplex viruses, antibody-dependent cellular cytotoxicity to target cells infected with; functional adequacy in neonate, 4 (Abst.)
Histamine, complement-mediated release of, from human basophils; possible regulatory role of microtubules and microfilaments (Grant, J. A., et al.), 306
-containing cells in bronchial lavage fluid; ultrastructural characterization and comparison with mast cells in three types of tissue in rhesus monkeys, 30 (Abst.)
in vitro, diagnosis of Polistes wasp hypersensitivity by venom-induced release of (Findlay, S. R., et al.), 230
isoproterenol, prostaglandin, and, in vitro effect of toluene diisocyanate on lymphocyte cyclic adenosine monophosphate production by (Davies, R. J., et al.), 223
plasma, relationship of, to activity of bronchial asthma (Simon, R. A., et al.), 312
reactivity, bronchial; its relationship to reactivity of bronchi to allergens, 1 (Abst.)
release, allergic, regulatory role of prostaglandin E in, with observations of responsiveness of basophil leukocytes and effect of acetylsalicylic acid (Okazaki, T., et al.), 360
and selected antigens, circadian rhythms in cutaneous reactivity to, including phase relationship to urinary cortisol excretion, 14 (Abst.)
and sympathomimetic amines, effect of disodium cromoglycate and *Picrorrhiza kurroa* root powder on sensitivity of guinea pigs to, 15 (Abst.)
HLA-B8 and dermatitis herpetiformis in patients with IgA deposits in skin, 9 (Abst.)
Homocytotropic antibody formation and anaphylactic sensitization, prevention of, by prefeeding antigen (David, M. F.), 180
responses, inhibition of, in adult inbred mice by previous feeding of specific antigen (Vaz, N. M., et al.), 110
Honeybee venom, high molecular weight allergenic fraction of (Karpas, A. B., et al.), 155
Humidifiers, room, as source of *Acinetobacter* infections, 6 (Abst.)
Hypersensitivity, cutaneous delayed, and cell-mediated immunity in vitro responses assessed by diphtheria and tetanus toxoids, relationship between (Galant, S. P., et al.), 247
delayed, induction of, to protein antigens in mice without Freund adjuvants (Crowle, A. J., et al.), 14
human delayed-type, sensitive in vitro correlate for; active E-rosette test, 12 (Abst.)
IgE mediated, in aging, 26 (Abst.)
insect, diagnosis of (Sobotka, A. K.), 213 (Editorial)
to nonsteroidal anti-inflammatory drugs and their pathogenesis, clinical patterns of (Szczeklik, A., et al.), 276
penicillin, evaluation of; value of clinical history and skin testing with penicilloyl-polylysine and penicillin G (Green, G. R., et al.), 339
pneumonitis, immunopathogenesis of (Schatz, M., et al.), 27
study of effects of systemic administration of adrenal glucocorticoids in experimental model of, 10 (Abst.)
pulmonary, to *Alternaria* and *Aspergillus* in baker's asthma, 29 (Abst.)
reactions, human immediate, factors in tissue eosinophil responses in, 20 (Abst.)

I

IgE antibody(ies), to cat allergens in allergic population (Ohman, J. L., Jr., et al.), 317
measurement of absolute levels of, in patients with ragweed hay fever (Gleich, G. J., et al.), 188
specific, in nasal secretion from patients with allergic rhinitis and with negative or weakly positive RAST on serum, 32 (Abst.)
measurements, specific and total serum, in diagnosis of penicillin allergy, 25 (Abst.)
mediated hypersensitivity in aging, 26 (Abst.)
ragweed antibody level, preseasonal, as predictor of response to therapy of ragweed hay fever with intranasal cromolyn sodium solution (Welsh, P. W., et al.), 104
serum, in dermatitis and dermatosis; analysis of 497 cases, 14 (Abst.)
synthesis in man; development of specific IgE antibodies after immunization with tetanus-diphtheria (Td) toxoids, 16 (Abst.)
IgG short-term sensitizing antibodies in allergic population, incidence of (Nelson, H. S., et al.), 266
Immune complexes in Behçet's syndrome and recurrent oral ulceration, 31 (Abst.)
circulating, and activation of complement sequence in acute allergic bronchopulmonary aspergillosis (Geha, R. S.), 357
Immunodeficient, immunologic assessment of (Hong, R.), 83 (Requested manuscript)
Immunoglobulinemia, hyper-M-, in children with bronchial asthma, 27 (Abst.)
Immunologic assessment of immunodeficient (Hong, R.), 83 (Requested manuscript)
basis of autoimmunization (Schwartz, R. S.), 69 (Requested manuscript)
studies, clinical and; trimellitic anhydride–induced airway syndromes (Zeiss, C. R., et al.), 96
Immunologically induced secretory process, role of cyclic GMP as modulator of; human lung tissue and anaphylaxis (Kaliner, M.), 204
Immunology, 4, 10, 16, 21, 26, 31 (Absts.)
clinical, expanding role of allergist in (Bloch, K. J.), 144 (Requested manuscript)
Immunopathogenesis of hypersensitivity pneumonitis (Schatz, M., et al.), 27
Immunopathology of bronchial mucosa in "late onset" asthma, 29 (Abst.)

Immunoprecipitin tests, variability of extracts used in (Fink, J. N., et al.), 238
Infection(s), *Acinetobacter*, room humidifiers as source of, 6 (Abst.)
severe disseminated adenovirus, successfully treated with thymic humoral factor, THF, 26 (Abst.)
Insect hypersensitivity, diagnosis of (Sobotka, A. K.), 213 (Editorial)
Isoproterenol, nebulized metaproterenol and, double-blind evaluation of use of, in hospitalized asthmatic children and adolescents (Garra, B., et al.), 63
prostaglandin, and histamine, in vitro effect of toluene diisocyanate on lymphocyte cyclic adenosine monophosphate production by (Davies, R. J., et al.), 223

L

Labor of love (Patterson, R.), 333 (Editorial)
Lenticular complications of long-term steroid therapy in children with asthma and eczema (Sevel, D., et al.), 215
Leucocyte(s) aggregation, antigen-induced buffy coat, evaluation of, as simple test of allergic reactivity, 26 (Abst.)
basophil, and effect of acetylsalicylic acid, regulatory role of prostaglandin E in allergic histamine release with observations on responsiveness of (Okazaki, T., et al.), 360
candidacidal defect, implication of; disseminated candidiasis in previously healthy girl, 11 (Abst.)
migration inhibitory activity of conconavalin-A–stimulated human lymphocytes, 5 (Abst.)
Leukotaxis, abnormalities of, in atopic dermatitis (Snyderman, R., et al.), 121
Levamisole, concentrations of, required for enhanced proliferation of human lymphocytes and phagocytosis by macrophages, 24 (Abst.)
Love, labor of (Patterson, R.), 333 (Editorial)
Lung disease, farmer's, correlation of exposure to various respiratory pathogens with (Marx, J. J., Jr., et al.), 169
immunologic reactivity of; effects of corticosteroids on alveolar macrophage cytotoxic effector cell function, 4 (Abst.)
tissue, human, and anaphylaxis; role of cyclic GMP as modulator of immunologically induced secretory process (Kaliner, M.), 204
Lymph node, human normal, regional tumour lymph node and inflammatory lymph node, T and B lymphocyte populations in, 27 (Abst.)
Lymphocyte(s), conconavalin-A–stimulated human, leucocyte migration inhibitory activity of, 5 (Abst.)
human, absence of effect of ephedrine on levels of cyclic adenosine monophosphate in (Lee, T.-P., and Reed, C. E.), 141
and phagocytosis by macrophages, concentrations of levamisole required for enhanced proliferation of, 24 (Abst.)
neutrophils and serum proteins, sequential studies of, during prednisone treatment, 5 (Abst.)
physiology, normal; immunologic assessment of immunodeficient (Hong, R.), 83 (Requested manuscript)
populations, T and B, in human normal lymph node, regional tumour lymph node and inflammatory lymph node, 27 (Abst.)
subpopulations of atopic children and effect of therapy upon them (Saraclar, Y., et al.), 301
in human malnutrition; cytotoxic and suppressor cells, 12 (Abst.)

M

Macrophages, phagocytosis by, enhanced proliferation of human lymphocytes and, concentrations of levamisole required for, 24 (Abst.)
Malnutrition, human, lymphocyte subpopulations in; cytotoxic and suppressor cells, 12 (Abst.)
Metabolic and cardiovascular effects of carbuterol and metaproterenol (Sanders, J. P., et al.), 174
Metabolic—Cont'd
effects of oral salbutamol, 3 (Abst.)
Metaproterenol, carbuterol and, metabolic and cardiovascular effects of (Sanders, J. P., et al.), 174
nebulized, and isoproterenol, double-blind evaluation of use of, in hospitalized asthmatic children and adolescents (Garra, B., et al.), 63
Methacholine and physostigmine airway reactivity in asthmatic and nonasthmatic subjects (Miller, M. M., et al.), 116
Mice, adult inbred, inhibition of homocytotropic antibody responses in, by previous feeding of specific antigen (Vaz, N. M., et al.), 110
induction of delayed hypersensitivity to protein antigens in, without Freund adjuvants (Crowle, A. J., et al.), 14
Miscellaneous, 6 (Absts.)
Molecular weight chemical agents, low, occupational asthma caused by (Davies, R. J., et al.), 93 (Editorial)
Mucosal permeability, airway, in *Ascaris suum*–sensitive rhesus monkey (Boucher, R. C., et al.), 134
"Multicore" soldering flux and colophony resin, fumes from; asthma due to inhaled chemical agents, 7 (Abst.)

N

Neonate, functional adequacy in; antibody-dependent cellular cytotoxicity to target cells infected with herpes simplex viruses, 4 (Abst.)
Neutrophil(s) chemotactic responses, defective, in patients with recurrent episodes of otitis media and chronic diarrhea, 15 (Abst.)
lymphocytes, and serum proteins, sequential studies of, during prednisone treatment, 5 (Abst.)

O

Organelles, cytoplasmic, of eosinophils; eosinophil, new aspects of structure and function (Gleich, G. J.), 73 (Requested manuscript)
Oropharyngeal candidiasis in patients treated with triamcinolone acetonide aerosol (Pingleton, W. W., et al.), 254
Osteogenic sarcoma, concomitant presence of tumor-specific cytotoxic and inhibitor lymphocytes in patients with, 22 (Abst.)
Otitis media and chronic diarrhea, recurrent episodes of, defective neutrophil chemotactic responses in patients with, 15 (Abst.)
Otolaryngology, otorhinology and, 32 (Abst.)
Otorhinology and otolaryngology, 32 (Abst.)

P

Panic-fear in asthma; requests for as-needed medications in relation to pulmonary function measurements (Dahlem, N. W., et al.), 295
Pathogens, various respiratory, correlation of exposure to, with farmer's lung disease (Marx, J. J., Jr., et al.), 169
Pathology, pharmacology, physiology, and, 3, 10, 15, 19, 24, 30 (Absts.)
Pediatrics, 15, 18, 23 (Absts.)
Penicillin allergy, specific and total serum IgE measurements in diagnosis of, 25 (Abst.)
G, value of clinical history and skin testing with penicilloyl-polylysine and; evaluation of penicillin hypersensitivity (Green, G. R., et al.), 339
hypersensitivity, evaluation of; value of clinical history and skin testing with penicilloyl-polylysine and penicillin G (Green, G. R., et al.), 339
Penicilloyl-polylysine and penicillin G, value of clinical history and skin testing with; evaluation of penicillin hypersensitivity (Green, G. R., et al.), 339
Persulfate hair bleach reactions; cutaneous and respiratory manifestations, 2 (Abst.)
Phagocytosis by macrophages, enhanced proliferation of human lymphocytes and, concentrations of levamisole required for, 24 (Abst.)

Pharmacology, physiology, and pathology, 3, 10, 15, 19, 24, 30 (Absts.)
Phenobarbital, salicylate and, effects of, on lymphocyte proliferation and function, 10 (Abst.)
Phthalic anhydride asthma, 7 (Abst.)
Physiology, normal lymphocyte; immunologic assessment of immunodeficient (Hong, R.), 83 (Requested manuscript)
pharmacology, and pathology, 3, 10, 15, 19, 24, 30 (Absts.)
Physostigmine airway reactivity, methacholine and, in asthmatic and nonasthmatic subjects (Miller, M. M., et al.), 116
Picrorrhiza kurroa root powder, disodium cromoglycate and, effect of, on sensitivity of guinea pigs to histamine and sympathomimetic amines, 15 (Abst.)
Plasma theophylline levels, reliability of salivary theophylline as guide to, 31 (Abst.)
Pneumonia, chronic eosinophilic, followed by polyarteritis nodosa complicating course of bronchial asthma (Cogen, F. C., et al.), 377
Pneumonitis, hypersensitivity, immunopathogenesis of (Schatz, M., et al.), 27
study of effects of systemic administration of adrenal glucocorticoids in experimental model of, 10 (Abst.)
Poliomyelitis, chronic progressive, secondary to vaccination of immunodeficient child, 20 (Abst.)
Polistes wasp hypersensitivity; diagnosis by venom-induced release of histamine in vitro (Findlay, S. R., et al.), 230
Pollen extracts, ragweed; *see* Ragweed pollen extracts
Polyarteritis nodosa complicating course of bronchial asthma, chronic eosinophilic pneumonia followed by (Cogen, F. C., et al.), 377
Prednisone treatment, sequential studies of lymphocytes, neutrophils and serum proteins during, 5 (Abst.)
Prostaglandin E, regulatory role of, in allergic histamine release, with observations on responsiveness of basophil leukocytes and effect of acetylsalicylic acid (Okazaki, T., et al.), 360
isoproterenol, and histamine, in vitro effect of toluene diisocyanate on lymphocyte cyclic adenosine monophosphate production by (Davies, R. J., et al.), 223
Protein antigens, induction of delayed hypersensitivity to, in mice without Freund adjuvants (Crowle, A. J., et al.), 14
Psychology, behavior, and treatment of asthma (Graham, D. T.), 273 (Editorial)
Pulmonary disease, chronic obstructive, unpredictability of theophylline saliva measurements in (Hendeles, L., et al.), 335
function measurements, requests for as-needed medications in relation to, in panic-fear in asthma (Dahlem, N. W., et al.), 295
hypersensitivity to *Alternaria* and *Aspergillus* in baker's asthma, 29 (Abst.)

R

Radioallergosorbent test, negative or weakly positive, on serum, specific IgE antibodies in nasal secretion from patients with allergic rhinitis and, 32 (Abst.)
Ragweed antibody level, preseasonal IgE, as predictor of response to therapy of ragweed hay fever with intranasal cromolyn sodium solution (Welsh, P. W., et al.), 104
hay fever, measurement of absolute levels of IgE antibodies in patients with (Gleich, G. J., et al.), 188
preseasonal IgE antibody level as predictor of response to therapy of, with intranasal cromolyn sodium solution (Welsh, P. W., et al.), 104
pollen extracts, evaluation of RAST inhibition as method for standardization of, 13 (Abst.)
–tyrosine adsorbate, glutaraldehyde-modified—, allergen injection therapy with (Cockcroft, D. W., et al.), 56
RAST inhibition, allergenic potency of bee antigens measured by, 3 (Abst.)
evaluation of, as method for standardization of ragweed pollen extracts, 13 (Abst.)
Recertification: quo vadis (Salvaggio, J. E.), 153; 212 (Correspondence)
Respiratory infection, prospective study of, in asthmatic patients treated with beclomethasone dipropionate and sodium cromoglycate, 17 (Abst.)
pathogens, various, correlation of exposure to, with farmer's lung disease (Marx, J. J., Jr., et al.), 169
syncytial virus in early infancy; circulating antibody and severity of infection, 11 (Abst.)
Rhesus monkey(s), *Ascaris suum*–sensitive, airway mucosal permeability in (Boucher, R. C., et al.), 134
ultrastructural characterization and comparison with mast cells in three types of tissue in; histamine-containing cells in bronchial lavage fluid, 30 (Abst.)
Rhinitis, allergic, and allergic asthma, effect of deep inspiration on airway conductance in subjects with (Fish, J. E., et al.), 41
specific IgE antibodies in nasal secretion from patients with, and with negative or weakly positive RAST on serum, 32 (Abst.)
seasonal allergic, efficacy double-blind, crossover study of sodium cromoglycate in patients with, 8 (Abst.)

S

Salbutamol, intravenous aminophylline and, comparison of, in severe asthma, 14 (Abst.)
oral, metabolic effects of, 3 (Abst.)
Salicylate and phenobarbital, effects of, on lymphocyte proliferation and function, 10 (Abst.)
Saliva measurements, theophylline, unpredictability of, in chronic obstructive pulmonary disease (Hendeles, L., et al.), 335
Salivary theophylline, reliability of, as guide to plasma theophylline levels, 31 (Abst.)
SCH 1000, aerosolized atropine sulfate and, comparison of, on exercise-induced bronchospasm in children (Borut, T. C., et al.), 127
Sensitization, anaphylactic, prevention of homocytotropic antibody formation and, by prefeeding antigen (David, M. F.), 180
Serum IgE in dermatitis and dermatosis; analysis of 497 cases, 14 (Abst.)
proteins, sequential studies of lymphocytes, neutrophils and, during prednisone treatment, 5 (Abst.)
Sheep erythrocyte rosette formation, in vitro effect of fetuin on, with human T lymphocytes, 22 (Abst.)
Skin testing, allergic; clinical investigation (Imber, W. E.), 47
clinical history and, with penicilloyl-polylysine and penicillin G, value of; evaluation of penicillin hypersensitivity (Green, G. R., et al.), 339
Societies, allergy, listing of state, regional, and local, and presidents as of March, 1977, 89
Sodium cromoglycate, efficacy double-blind, crossover study of, in patients with seasonal allergic rhinitis, 8 (Abst.)
ointment, clinical trial of, for treatment of atopic eczema in children, 23 (Abst.)
orally administered, effect of, on symptoms of food allergy, 18 (Abst.)
prospective study of respiratory infection in asthmatic patients treated with beclomethasone dipropionate and, 17 (Abst.)
South Bronx, asthma in; clinical and epidemiologic characteristics (Karetzky, M. S.), 383
Steroid therapy, long-term, lenticular complications of, in children with asthma and eczema (Sevel, D., et al.), 215
Stimulant, beta$_2$-adrenergic, treatment of chronic urticaria with, 9 (Abst.)

T

Tartrazine oral challenge, aspirin and; incidence of adverse response in chronic childhood asthma (Vedanthan, P. K., et al.), 8
Terbutaline and ephedrine in asthmatic children, 23 (Abst.)

Tetanus-diphtheria (Td) toxoids, development of specific IgE antibodies after immunization with; IgE synthesis in man, 16 (Abst.)
toxoids, diphtheria and, relationship between cutaneous delayed hypersensitivity and cell-mediated immunity in vitro responses assessed by (Galant, S. P., et al.), 247
Theophylline, administration of erythromycin to patients on, 149 (Correspondence)
clearance rate, variation in, 271 (Correspondence)
saliva measurements, unpredictability of, in chronic obstructive pulmonary disease (Hendeles, L., et al.), 335
salivary, reliability of, as guide to plasma theophylline levels, 31 (Abst.)
Thymic humoral factor, THF, severe disseminated adenovirus infection successfully treated with, 26 (Abst.)
Time has come (Krause, R. M.), 1
Toluene diisocyanate, in vitro effect of, on lymphocyte cyclic adenosine monophosphate production by isoproterenol, prostaglandin, and histamine (Davies, R. J., et al.), 223
Toxoids, tetanus-diphtheria (Td), development of specific IgE antibodies after immunization with; IgE synthesis in man, 16 (Abst.)
Tranexamic acid; preoperative prophylactic therapy for patients with hereditary angioneurotic edema (Sheffer, A. L., et al.), 38
Triamcinolone acetonide aerosol, oropharyngeal candidiasis in patients treated with (Pingleton, W. W., et al.), 254
Trimellitic anhydride—induced airway syndromes: clinical and immunologic studies (Zeiss, C. R., et al.), 96
Tumor-specific cytotoxic and inhibitor lymphocytes in patients with osteogenic sarcoma, concomitant presence of, 22 (Abst.)
Tyrosine adsorbate, glutaraldehyde-modified—ragweed pollen–, allergen injection therapy with (Cockcroft, D. W., et al.), 56

U

Urticaria and angioedema, mediators of (Kaplan, A. P.), 324 (Requested manuscript)
chronic, treatment of, with $beta_2$-adrenergic stimulant, 9 (Abst.)

V

Vaccination of immunodeficient child, chronic progressive poliomyelitis secondary to, 20 (Abst.)
Venom, honeybee, high molecular weight allergenic fraction of (Karpas, A. B., et al.), 155
-induced release of histamine in vitro, diagnosis of Polistes wasp hypersensitivity by (Findlay, S. R., et al.), 230
Ventilatory arrests in hospital, analysis of sudden deaths and, in patients with asthma, 17 (Abst.)
Virus, respiratory syncytial, in early infancy; circulating antibody and severity of infection, 11 (Abst.)
